ARIAT® TECHNOLOGIES AND FEATURES

ABRASION RESISTANT

Durable, specially woven fabrication prevents wear in high-friction areas.

BREATHABLE WATERPROOF

Breathable waterproof garments are windproof, waterproof and seam-sealed. Surface fabric repels wind and water but allows body vapor to escape.

COOL CLIMATE INSULATION™

Cool Climate Insulation™ provides optimal lightweight comfort and warmth.

DURASTRETCH™

Elastic fibers woven into fabric for maximum flex.

GREATER ARM MOBILITY (GAM)

Ariat Greater Arm Mobility technology extends inseams in the garment so shirt cuffs and shirt tail do not shift during optimal range of motion.

LENS CLOTH

Hidden microfiber lens cloth on shirt tail.

MOISTURE MOVEMENT TECHNOLOGY™ (MMT™)

Ariat Moisture Movement Technology™ pulls moisture to the outside of the garment so it evaporates quickly, keeping you dry and comfortable.

FreshTEK

Sustainable odor-resistant finish that inhibits the growth of bacterial odors to keep you smelling fresh.

PRE-SHRUNK

Fabric is prewashed to prevent shrinking.

REFLECTIVE TRIM

Increases visibility for safety.

ClimateTEK

ClimateTEK Cooling technology automatically reacts to changes in your body, keeping you cool when things heat up and comfortable when you're at rest.

STAIN-RELEASE

Stain-repellent finish provides protection against stains, dirt and other marks. This added feature is ideal for keeping outerwear looking new and unblemished.

SUN PROTECTION FABRIC™

Provides protection from sunrays.

TOUGHMAX™

Engineered for exceptional toughness, the flexible stretch canvas is the ultimate in comfort and durability.

TRIPLE NEEDLE STITCHED

Triple needle stitched seams provide an extra level of durability and stand up to the toughest jobs.

V3® STRETCH MESH

Ariat exclusive, elasticized mesh panels, built into the styling, accommodate a full-range of motion and maximum breathability in the shoulder and upper torso.

V-BLOCK

Fabric protected with an antimicrobial finish. This product does not protect users or others against bacteria, viruses, germs, or other disease. Always clean this product thoroughly after each use.

VentTEK™

Ariat VentTEK™ technology features body mapping to enable air flow and regulate body temperature.

INDEX BY STYLE NAME »

INDEX BY STYLE # »

WATCH WINDOW

Watch Window for easy access while on the job.

WATER REPELLENT

WIND & WATER RESISTANT

Wind and water resistant garments employ a thin technological coating on lightweight surface fabric to block wind and protect from light rain.

WIND RESISTANT

ZONE-WELDED

Zone-welded insulation for performance warmth where you need it most.

PARTNER TECHNOLOGIES AND FEATURES

3M THINSULATE™ INSULATION

3M Thinsulate™ Insulation is engineered to be thin, lightweight and durable while providing exceptional warmth in cold and damp conditions.

BLUESIGN®

The independent bluesign® standard is the response to increasing demand for textile products that are environmentally friendly, pose no health hazards, and conserve resources to the greatest possible extent. The bluesign® standard is built around five principles: resource productivity, consumer safety, air emission, water emission and occupational health and safety.

POLARTEC® POWER DRY® FR

Created to give base fabrics greater efficiency, more dependable wicking properties, faster dry times and better overall performance. Thoughtfully designed mechanical wicking fabric and patented bi-component construction combine to create a superior base material that pulls moisture from the skin, expands for faster evaporation and lasts the life of the fabric.

SAFETY RATINGS, SPECIFICATIONS AND CERTIFICATIONS

ANSI 3 COMPLIANT*

ANSI

American National Standards Institute (ANSI) 107 – American National Standard for High-Visibility Safety Apparel and Accessories. The 360° reflective coverage of ANSI 107 Type R Class 3 compliant garments provides the highest Hi-Vis safety rating for work environments where visibility is of the highest importance.

*Based on independent testing

ASTM F1506

This American Society for Testing and Materials (ASTM) international specification covers the minimum design characteristics and performance requirements for occupational apparel worn by electrical workers exposed to momentary electric arc and related thermal hazards.

CAT RATINGS

A CAT is a rating assigned to dual hazard FR workwear that indicates the level of protection the garment provides against electrical arcs. CAT 0 represents the lowest level of rated protection and CAT 4 represents the highest level of rated protection. Most of Ariat's FR workwear falls within CAT 2 based on their ATPV ratings.

NFPA 70E

The National Fire Protection Association's (NFPA) 70E – Standard for Electrical Safety in the Workplace establishes requirements for the protection of employees from possible exposure to workplace electrical discharge hazards.

*Based on independent testing

NFPA 2112

The National Fire Protection Association's (NFPA) 2112 – Standard on Flame-Resistant Clothing for Protection of Industrial Personnel Against Short-Duration Thermal Exposures from Fire establishes the requirement for certifying garments designed to provide protection of employees from possible flash fire hazards in the workplace.

*Based on independent testing

OSHA 29 CFR 1910.26

This section of the Occupational Safety and Health Administration's (OSHA) 29 CFR 1910.269 covers the operation and maintenance of electric power generation, control, transformation, transmission, and distribution lines and equipment.

UL®

UL provides safety-related certification, validation, testing, inspection, auditing, advising and training services to a wide range of clients, including manufacturers, retailers, policymakers, regulators, service companies, and consumers.

ARIAT® TECHNOLOGIES AND FEATURES

ABRASION RESISTANT

Durable, specially woven fabrication prevents wear in high-friction areas.

BREATHABLE WATERPROOF

Breathable waterproof garments are windproof, waterproof and seam-sealed. Surface fabric repels wind and water but allows body vapor to escape.

COOL CLIMATE INSULATION™

Cool Climate Insulation™ provides optimal lightweight comfort and warmth.

DURASTRETCH™

Fabrication with just the right amount of flex for increased mobility and all-day performance.

FEATHERLIGHT FABRIC

Ultra lightweight fabric.

GREATER ARM MOBILITY (GAM)

Ariat Greater Arm Mobility technology extends inseams in the garment so shirt cuffs and shirt tail do not shift during optimal range of motion.

MAXMOVE™ GUSSET

360 degree flex construction.

MOISTURE MOVEMENT TECHNOLOGY™ (MMT™)

Ariat Moisture Movement Technology™ pulls moisture to the outside of the garment so it evaporates quickly, keeping you dry and comfortable.

FreshTEK

Sustainable odor-resistant finish that inhibits the growth of bacterial odors to keep you smelling fresh.

SUN PROTECTION FABRIC™

Provides protection from sunrays.

TRIPLE NEEDLE STITCHED

Triple needle stitched seams provide an extra level of durability and stand up to the toughest jobs.

V3® STRETCH MESH

Ariat exclusive, elasticized mesh panels, built into the styling, accommodate a full-range of motion and maximum breathability in the shoulder and upper torso.

VentTEK™

Ariat VentTEK™ technology features body mapping to enable air flow and regulate body temperature.

WATER REPELLENT

WIND & WATER RESISTANT

Wind and water resistant garments employ a thin technological coating on lightweight surface fabric to block wind and protect from light rain.

WIND RESISTANT

PARTNER TECHNOLOGIES AND FEATURES

3M™ SCOTCHLITE™ DIAMOND MESH REFLECTIVE MATERIAL

3M™ Scotchlite™ Diamond Mesh Reflective Material combines breathable open mesh design to allow air and moisture to pass through with 32-angle table brightness compliance to keep wearers visible from many angles.

POLARTEC® HARDFACE®

Polartec® Hardface® is a patented polymer surface treatment applied to enhance durability. Fused at the fiber level, Hardface® increases abrasion resistance and water repellency.

POLARTEC® POWER DRY® FR

Created to give base fabrics greater efficiency, more dependable wicking properties, faster dry times and better overall performance. Thoughtfully designed mechanical wicking fabric and patented bi-component construction combine to create a superior base material that pulls moisture from the skin, expands for faster evaporation and lasts the life of the fabric.

POLARTEC® POWER GRID™ FR

Patented grid design structure that reduces fabric weight while increasing warmth and compressibility in the process. This grid construction enhances both wicking efficiency and breathability by generating channels of targeted touch points that absorb and diffuse moisture vapor for faster evaporation.

POLARTEC® WIND PRO® FR

By adapting Polartec® fleece structure through tighter knit constructions a new fabric composition that drastically reduces wind permeation has been created. Polartec® Wind Pro® provides the thermal insulation benefits, comfort and breathability of fleece with the added performance abilities to defy the wind and repel all forms of moisture.

FR WORKWEAR FAQ

1. Who is Ariat® Flame-resistant (FR) Workwear designed for?

Ariat® FR Workwear is designed for electricians and workers in the utility, oil, gas and petrochemical fields who are at risk of exposure of electric arc flashes and flash fires, which could cause severe or fatal burn injuries. Typical candidates for FR workwear include electric linemen, pipeline and refinery workers, as well as industrial electricians.

2. How does Ariat® FR Workwear help protect against burn injury?

Through the use of flame-resistant chemicals or fabric blends, Ariat® FR Workwear is designed to self-extinguish within seconds after the source of ignition is removed, which may permit the wearer to react to an accidental exposure. It is not designed to be flame proof; it is flame-resistant.

3. Can the flame-resistant chemicals be washed out?

Provided you follow garment care instructions for Ariat® FR Workwear, reasonable laundering should not affect the flame-resistant properties of the fabric.

4. How can Ariat® FR Workwear be distinguished from traditional Ariat Workwear?

Ariat® FR Workwear is clearly identified with “Ariat FR” labels on the middle of sleeves, back necks, or on the coin pocket of denim. Product hang tags and CAT labels also help distinguish Ariat flame-resistant products.

5. What is a CAT?

A CAT is a rating for FR workwear that indicates the level of protection the garment provides. There are five CATs ranging from 0-4, with a CAT of 0 representing the least protection, and a CAT of 4 representing the most protection. The NFPA 70E consensus standard assigns these categories based on the electrical maintenance that is to be performed, and each CAT correlates to a specific range of ATPVs. For example, CAT 1 would include ATPVs equal to or greater than 4 cal/cm² but less than 8 cal/cm².

6. What is an ATPV?

An Arc Thermal Performance Value (ATPV) is a rating assigned to flame-resistant workwear indicating the level of protection provided. Higher-weight fabrics typically have a higher ATPV and provide increased protection (as does the layering of FR workwear). All Ariat® FR Workwear has the ATPV marked on the hang tag for easy reference.

7. Can I repair my FR workwear?

No. If you have a rip or other damage to your FR workwear, you must not use it.

8. Can I use DEET on flame-resistant workwear?

No. DEET is one of the most effective mosquito repellents on the market, but it should only be used on the skin, never on FR workwear. For the most effective mosquito and tick protection, use DEET based repellents on skin (especially on exposed skin) and use a permethrin (the active ingredient in most lice shampoos) product washed into or applied to flame-resistant workwear. These products do not add any appreciable flammability to FR workwear and therefore do not affect its flame-resistant properties. When using permethrin in a spray form, use the WATER-BASED formulas only. Propellants are almost always flammable in this application, so the powder form washed into the workwear or the WATER-BASED spray formulas is recommended.

FR WORKWEAR CARE INSTRUCTIONS

WARNING: Failure to launder garment properly can result in loss of flame-resistance properties.

- Ariat does not recommend dry cleaning FR garments. In some cases dry cleaning chemical residue left on the fabric could burn.
- Due to the various care instructions of different fabrics and styles we recommend following the care instructions listed inside each individual garment.
- Flame-resistant workwear should be laundered separately from the family wash to prevent cross contamination.
- Washing new garments before wearing is recommended. Wash new garments separately from other garments.
- Turn garment inside out before washing for best results.
- Machine wash using typical home laundry detergent.
- Liquid detergents or other products containing hydrogen peroxide should not be used.
- Avoid starch, fabric softener or any other laundry additives such as soil release or antistatics.
- Bleach must never be used on FR fabrics.
- Chlorine bleach (sodium hypochlorite) and oxygen bleach (hydrogen peroxide), either alone or in combination with other chemistry must never be used.

MEASUREMENT GUIDE

NECK Measure around the middle of your neck, inserting a finger or two between the tape and your neck to allow for comfort.

CHEST Measure around the chest, under the armpits and over the highest part of your chest and shoulder blades keeping the tape parallel to the floor.

WAIST Find your natural waistline and measure.

SLEEVE Bend your arm 90 degrees and put your hand on your hip. Hold the tape measure at the center back of your neck and measure across your shoulder to your elbow, and then down to your wrist.
